PASTORAL CORNER

Hello! My name is Michael White, and I have been the parish organist here for the past 7 years. I have been asked to write to you about our upcoming Organ Project.

The mighty Hilborne L. Roosevelt Organ in the back of the Church was built in 1885, and installed in 1887. This organ is quite historic, not only due to its age and builder, but also being one of the last of this builder represented in this area. Besides regular tuning and maintenance in the life of a pipe organ, there are major projects every 30-40 years to help ensure the life of the organ for the next generation. This year we have embarked on a very exciting project for our historic instrument; allow me to tell you about it!

First is a NEW Console and control system. The current console, which is the keyboards that the organist sits and plays, was last revised in the late 1980's. That console and the organ's control system (computer that runs the organ), in the last couple of years, have begun to show their age. In consultation with the music staff, the parish staff and councils, we have elected to have a BRAND NEW console custom designed and built for us, and a new control system installed. The console will be built with a historical nod to the past (looks wise), but will have all the modern specifications/standards of today. The New Control System (operating system) will have 100 levels of Memory for the organists' stop/sound combinations (currently there are only 4) and other modern tools useful in today's world such as a record and playback feature.

Tonal Changes: Due to the new control system, we are going to be able to expand the instrument by about 20 stops/sounds! This will be done primarily by "borrowing" existing stops/sounds from the other parts of the organ and having them available on other keyboards for added flexibility. A set of REAL tubular Chimes with striking actions will also be added. But the most exciting thing is a BRAND NEW stop/sound: a solo "Tuba." This stop is similar to a Trumpet, but with a lower/deeper sound, more in keeping with the sounds of our instrument. It will be on high wind pressure and will sound over the rest of the organ. In addition to organ repertoire featuring the Tuba stop, it is useful for "soloing-out" melodies of hymns, and playing the many

"Trumpet" type pieces everyone likes at weddings.

Maintenance/Renovation/Restoration: There will be a full cleaning and restoration of the reed (trumpet like) stops by an industry specialist as well as any repairs of the pipes if needed. Lastly is the "Tonal Regulation" of many stops/sounds to ensure they all sound the way they are supposed to be sounding (similar to making sure one note isn't sounding louder or softer than it should and that stop all sounds the same).

A VERY exciting project, and I'll keep you updated!

WORSHIP

Sung Mass Responses: Our community's sung and spoken responses during the ritual prayers of the liturgy are a core element of our communal prayer. At all weekend celebrations of the Holy Sacrifice of the Mass, we are singing the Sienna Chant Mass responses which are found in the Blue Hymnal (#149-#154) starting with the Kyrie (#149). The other mass parts follow the Kyrie.

PARISH COMMUNITY
